Spaces

Bringing life to public spaces with Light Art

The international
LAIPS conference

#LAIPS
#LightArtLAB

Light & Art in Public Spaces (LAIPS) is an EU project that aims to strengthen city capacities on permanent light art installations in public spaces. It fosters transnational cooperation among cities, exchanging best practices, and making use of innovative digital tools. Led by LUCI, this 3-year project co-funded by the Creative Europe programme involves the cities of Lyon, Oulu and Turin.

OULU

Editorial

In today's busy and often monotonous urban environments, light art breathes life into public spaces. From architectural illuminations to light sculptures, light artworks can change the way we perceive the city. By contributing to the identity and creativity of places, permanent or semi-permanent light art helps cities develop attractive, safe and inclusive public spaces at night.

Exploring such opportunities is the core objective of this international conference that will conclude the *Light & Art in Public Spaces* project, co-funded by the EU Creative Europe programme. Over 100 practitioners involved in the field of light art will meet in Turin to discuss four central topics that are key to thinking about light art in public spaces today.

1

Creative Placemaking

How can light art be a practical tool for communities to shape the character of a place to generate economic value, promote enduring social change as well as improve the physical environment of cities and neighborhoods?

2

Innovative technologies

How do new forms of "smart" light art change our perception of and interaction with public spaces? How can digital tools help to promote light art?

3

Collaborative urban governance

How to build an effective chain of cooperation between cities, light artists and communities to activate light art to its fullest potential?

4

Sustainability & Wellbeing

What are the maintenance needs of light art to keep it in shape for future generations? How does light art provide solutions for cities to achieve their sustainability goals and support wellbeing and quality of life?

Reasons to attend

➤ Exchanging on the findings of the LAiPS project with the partners

➤ The launch of the **Light & Art (M)App**, a new digital tool that promotes light art in public spaces

➤ **Inspiring presentations with cross-disciplinary perspectives** from placemakers, light artists,

academics as well as city representatives

➤ Two night visits to **experience major light art installations** in Turin during the famous *Luci d'Artista* festival

➤ **Networking opportunities** with light art practitioners and enthusiasts
