# **FACTORY TOUR**

**... & more !**

We are absolutely thrilled to welcome you in the South of France, to visit our state-of-the-art industrial facility, get inspiration for your public realm projects, and enjoy the «Art de vivre à la Française»...

Designer and manufacturer of urban lighting furniture for more than 50 years, Technilum is located in the South of France, one hour from Montpellier, in an old wine factory entirely refurbished. Too cramped to fully satisfy ambitious orders, especially for international projects, and yet willing to grow, Technilum launched an extension of its production facilities, operational since 2017. The result of this industrial and architectural project is an efficient production facility perfectly integrated into the surrounding landscape typical of South of France.

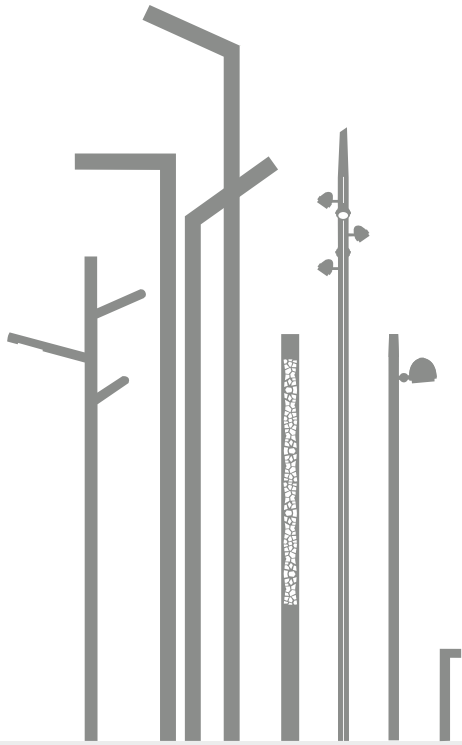

We will be very pleased to welcome you in Lezigno: visit our state-of-the-art factory, learn more about our expertise, share your experience with our team ... and enjoy your stay in the South of France, renowned for its unique «Art de vivre»!
