

2020 LUCI Asia Urban Lighting Workshop

November 2-3, 2020 (Mon-Tue)

**We invite you to the 2020 LUCI Asia Urban Lighting Workshop,
where chances for development and
vitalization of Asia's urban lighting await you!**

It is our great privilege to introduce the 2020 LUCI Asia Urban Lighting Workshop
that will be held November 2-3, 2020.

Currently, the world is experiencing changes like
never before due to the COVID-19 pandemic.

At a time like this, we hope the workshop will provide a forum
where major issues in urban lighting in cities around the world are shared and
discussed under a broader theme, "The Role of Urban Lighting in
the New-Normal Era and Smart Lighting in Asia."

This year's event will be held as an online virtual conference
as the COVID-19 situation is prolonged.

We hope this workshop will be a fruitful time for you and
your city through sharing insights and ideas with professionals in
urban lighting around the world.

Thank you for your interest and participation.

How to Join in the 2020 LUCI Asia Urban Lighting Workshop

For up to 200 pre-registered participants, a link (URL) and log-on information will be sent to join the online workshop. Anyone who are outside the 200, another link for closed broadcasting on YouTube will be separately sent.

- ① Click the link (URL) received via invitation e-mail and text message sent during the morning of the workshop day (KST).
- ② Enter the received 10-digit meeting ID
- ③ Set your name as [Affiliation_Name]
- ④ Click 'Join with Video'

※ Participation check will be done based on this set name. The check will be for issuing a certificate after the event is over. This online name cannot be changed after it is set, so please be careful to correctly enter the affiliation and name you used for the registration.

[How to Install and Log On to Zoom on PC]

<http://zoom.us> ▶ Download Center ▶ Download 'Zoom Client for Meetings'

[How to Install and Log On to Zoom on Mobile Device]

Search and install the Zoom application on Google Play store or App Store

No.	Settings	Details
1	Network	Stable network such as WI-FI or LAN (cable) is recommended. ※ If the network connection is not stable, audio/visual inputs and outputs may not be smooth.
2	Audio	Please check if your microphone and speaker work properly. ※ To minimize background noise and echoes, we recommend to use a headset or earphones
3	Video	If you use a desktop, additional devices for audio/visual inputs/outputs may be needed, such as web camera and microphone.
4	Battery	If you use a laptop or smartphone, please keep the devices charged at all times.
5	Mobile Phone	Please keep the screen horizontal
		To avoid temporary disruption of connectivity due to a call or text message, please make sure to turn on the airplane mode. ※ When you are returning back from a call or text messaging to the virtual conference, you have to log on again due to the automatic log-off; even before you are logged off, your phone's audio output may be affected without the airplane mode on.
6	Simultaneous Interpretation	Interpretation to English or Korean will be provided using stereo audio output and the service will be available through earphones. ※ Left: English; Right: Korean
